Experience

2025 – Present
Mexico City

ABR Servicio y Hospitalidad: Digital Technology Manager

- Management of the brand's digital ecosystem and institutional communication: development of the ABR Servicio y Hospitalidad (somosabr.com.mx) and ABR Construcción (obra.somosabr.com.mx) websites, SEO positioning, and alignment of the web presence with commercial and corporate reputation goals.
- Managed the Odoo ERP implementation with a team of up to 10 people: task planning and follow-up, user and permission administration, and point of contact between departments to meet agreed deadlines.
- Product Owner of 3 internal platforms (maintenance ticketing, construction project finance and operations control for a corporate client): requirements gathering with leadership, finance and operations, backlog prioritization, phased launch planning and working sessions with key users.
- Defined role-based KPIs and dashboards for decision-making, and centralized the financial data of 25+ construction projects into a single source of truth that replaced multiple scattered spreadsheets.
- Co-led the diagnosis and process reengineering of a 200+ employee group: interviews with the heads of 4 departments, process mapping, risk prioritization and centralized documentation.
- Use of AI to speed up specifications, solution development, documentation and day-to-day operational tasks.

2026 – Present
Remote

A.R. Monex Pro Cycling Team: Web Developer and Project Manager (Freelance)

- Managed and developed a web project in contracted phases with formal sign-off at each delivery: worked directly with the client's leadership, accounting and marketing teams to gather requirements and launch a membership, payments and automated e-invoicing system that eliminated manual invoicing.

2024 – 2025
Mexico City

S2G Energy: Unified Energy Management Platform Developer

- Led a team of 4 as Project Manager and QA Manager: deliverable planning and follow-up, quality control and delivery of the client's technical and strategic goals.
- Managed the development of an energy data visualization and analytics platform for the industrial division (EAID), integrating multiple data sources into dynamic dashboards for decision-making.

Education

2021 – 2026
Mexico City

Universidad Anáhuac México Norte

- B.S. in Information Systems and Technology Engineering.
- Diploma in Digital Communication.

2024
Sydney, Australia

University of New South Wales

- Semester-long international exchange program focused on entrepreneurship.

Extracurricular Activities and Awards

2025
Mexico City

Academic Excellence Award

- Ranked in the top 5% by overall GPA in the School of Engineering.

2023
Santa Elena, Ecuador

Acuario De Valdivia – Volunteer for environmental and nature conservation

- Participated in the care, feeding, rehabilitation and reintroduction of 40+ marine species within a conservation park.
- Carried out awareness activities with local fishing communities on the effects of overfishing and marine pollution, promoting sustainable practices.

Certifications

2026 **Fundamentals of Deep Learning – NVIDIA**
2025 **Fundamentals of Graphic Design – California Institute of the Arts**
2024 **AWS Academy Cloud Developing**
